PROFILE

Computer Science Engineering student with hands-on experience building end-to-end web applications using modern frontend and backend technologies, REST APIs, and databases. Seeking a Full Stack Developer internship to apply strong problem-solving skills and contribute to scalable, user-focused solutions.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, HTML, CSS

Frontend Development: React.js, Vite

Backend Development: Node.js, Express.js

Databases & ORM: MySQL, PostgreSQL, Prisma

AI & Generative AI: Retrieval-Augmented Generation (RAG)

Core Concepts: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS)

EDUCATION

Bachelor of Engineering (Computer Engineering) — Bharati Vidyapeeth College of Engineering, Navi Mumbai (University of Mumbai)

CGPA: 9.09 | Expected Graduation: 2028

HSC (Class XII) — Poddar Brio International School, Badlapur, Thane

Score: 80.67% | Year of Passing: 2023

SSC (Class X) — Bridgeford School, Ranchi, Jharkhand (CBSE)

Score: 96% | Year of Passing: 2021

PROJECTS

Task Manager API | *Node.js, Express.js, PostgreSQL, Prisma*

- Developed a RESTful Task Manager API using Node.js and Express.js to manage tasks, deadlines, priorities, and completion status
- Implemented CRUD operations for creating, retrieving, updating, and deleting tasks through REST API endpoints
- Integrated PostgreSQL with Prisma ORM for efficient database management and structured data modeling
- Implemented task due-date and status tracking to improve task organization and productivity
- Designed modular API routes and backend logic with a focus on scalability, maintainability, and reliable data handling

Personal Expense Tracker | *HTML, CSS, JavaScript, MySQL, Chart.js*

- Developed a full-stack expense management web application using HTML, CSS, JavaScript, and MySQL to track and manage personal expenses
- Implemented user authentication with login and signup functionality and developed CRUD operations for expense management
- Designed and integrated MySQL database models to store and manage user and expense data efficiently
- Integrated Chart.js to generate dynamic monthly spending charts, enabling users to analyze expense patterns and financial trends

ACHIEVEMENTS

- Qualified at the college level in Smart India Hackathon (SIH) as part of a team
- Collaborated with a team in a 24-hour hackathon at Bharati Vidyapeeth College of Engineering

CERTIFICATIONS

- Mastering Python — Infosys Springboard (2026)
- Introduction to Databases — Meta (2026)
