PROFESSIONAL SUMMARY

Computer Engineering student with hands-on experience developing full-stack web and mobile applications using modern frontend and backend technologies, REST APIs, databases, and cloud platforms. Strong foundation in software development, problem-solving, database management, and API integration, with experience building and deploying practical, user-focused applications.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Dart, HTML, CSS

Frontend Development: React.js, Next.js, Vite, Flutter

Backend Development: Node.js, Express.js, Next.js, REST APIs

Databases & ORM: MySQL, PostgreSQL, pgvector, Supabase, Prisma

Cloud & Tools: Google Cloud Storage, Git, GitHub, Android Studio

AI & Generative AI: Retrieval-Augmented Generation (RAG), Gemini API, Vector Embeddings, Semantic Search

EDUCATION

Bachelor of Engineering (Computer Engineering)

Expected Graduation: 2028

Bharati Vidyapeeth College of Engineering, Navi Mumbai (University of Mumbai) | CGPA: 9.09

HSC (Class XII) – Poddar Brio International School, Badlapur, Thane | 80.67%

2023

SSC (Class X) – Bridgeford School, Ranchi, Jharkhand (CBSE) | 96%

2021

PROJECTS

DocsChat – RAG-Powered Document Q&A

Next.js, Google Cloud Storage, PostgreSQL, pgvector, Gemini

- Developed a RAG-based document Q&A application that enables users to upload PDFs and ask questions based on their document content.
- Integrated Google Cloud Storage (GCS) for secure and persistent PDF storage and PostgreSQL with pgvector for storing document chunks and vector embeddings.
- Implemented semantic search using Gemini embeddings and cosine similarity to retrieve relevant document context for question answering.
- Integrated Gemini LLM with retrieved context to generate grounded responses, with document ownership, file validation, and retrieval guardrails to reduce hallucinations.

ProjectPartner – Side Project Collaboration Platform

Next.js, Supabase, Prisma, PostgreSQL

- Built a full-stack collaboration platform for creating projects, finding collaborators, submitting applications, and managing project teams.
- Implemented authentication, project management, collaboration workflows, and milestone tracking with Next.js and Supabase.
- Designed the database using PostgreSQL and Prisma ORM and implemented server-side data fetching and API routes with Next.js.

PuzzleWake – Puzzle-Based Alarm App

Flutter, Dart, Android Studio

- Developed a Flutter-based Android alarm application that requires users to solve a randomly generated jigsaw puzzle using an image before dismissing the alarm.
- Implemented alarm scheduling, puzzle generation, image-based puzzle interaction, sound selection, volume control, vibration, and dark mode.
- Built and tested the app for Android using Flutter and Android Studio, including release APK generation, with a simple, engaging user experience.

ACHIEVEMENTS

- Qualified at the college level in Smart India Hackathon (SIH); collaborated in a team in a 24-hour hackathon at Bharati Vidyapeeth College of Engineering.

CERTIFICATIONS

- Mastering Python – Infosys Springboard (2026)
- Introduction to Databases – Meta (2026)
